

## **"All-Natural" Water Treatment Technology (No Chemicals – Just O<sub>2</sub> - Oxygen)**

### **Key Benefits**

**For Your Water Body, Waste Water Lagoon/Ponds,  
or Storm Water Pond**

Storm Water Ponds, Lakes

Waste Water Ponds

## Benefits for the Water Column and Sludge/Sediment

- Raises the DO (dissolved oxygen) levels significantly from Surface to Bottom and into the sludge/sediment – Only Technology Capable – Cost Savings
- O<sub>2</sub> Ions Remediate organic pollutants via Fenton Chemistry and Leaves No Residue! Organic Pollutants Examples:
  - Ammonia
  - Phosphorous
  - Nitrogen
  - Anaerobic Bacteria, E.coli and Coliform
  - Enterococcus and Salmonella
  - PAHs
  - PFAS, Leachate
  - Pesticides
- Ionizer has a 10 plus year life span – Cost Savings
- Can operate 24/7 all year long – Cost Savings – Less Ponds Required
- New EcoLogic Controls now available – Labor Cost Savings
- Ionizer has Approved Financing up to 7 years at a lower government rate!
- Drinking Water Lake NSF/ANSI/CAN 61 Approval
- Ionizer coverage is ½ mile radius and up to 300 foot depth
- When Ionizer is shutoff the O<sub>2</sub>- Ion continues to remediate for up to 10 days.

*Only Current Technology with these Capabilities*
